

PRACTICAL

Section 12 – Answers

1. What is QSY?

Shall I change to another frequency? Change to another frequency.

2. Before transmitting on any frequency, what should you do?

Check if the frequency is clear.

3. Why would you want to change to a different frequency?

The frequency you initially met on may be a public frequency like a calling frequency.

4. What is the sequence of events to change frequencies?

- **Make sure the frequency is not in use. Revise Section 9**
- **Establish contact with another station on a frequency. Revise Section 10**
- **Tell the other station you suggest changing frequencies.**
- **You confirm the alternate frequency.**
- **Move to and check the alternate frequency to see if it is occupied. Revise Section 9**
- **If free, return to the original frequency and give the other station the frequency to move to.**
- **Change to the new frequency and call the other station.**
- **Continue the QSO.**
