

Part 8

Beacon Station

Section 36

The licensee must not operate the station in the frequency band 50 MHz to 52 MHz if it causes interference to the reception of the transmissions of a service that is specified to be a primary service for the 50-52 MHz band in the spectrum plan. (The primary service in the Australian Amateur Band Plan is broadcasting.)

Section 37

The beacon must transmit the station call sign at least once every 10 minutes during operation.
